

**February 2019**

**Incorporated Engineer Courses (IEng and IEng partial)**

The qualifications in this booklet have been accredited against standards set by the Institutions of Civil, Structural and Highways & Transportation Engineers, the Institute of Highway Engineers and endorsed by the Engineering Council and as such graduates from one of the accredited degree programmes will:

1. fully satisfy the educational base for an Incorporated Engineer (IEng) and an Engineering Technician (EngTech).

Graduates from a Foundation Degree, HND:

2. fully satisfy the education base for an Engineering Technician (EngTech).
3. partially satisfy the educational base for an Incorporated Engineer (IEng). A programme of accredited Further Learning will be required to complete the educational base for an Incorporated or Chartered Engineer.

From 1999 new accredited bachelor degree programmes became the educational benchmark standard for an Incorporated Engineer. However, some HNC/D or Foundation Degree courses were still recognised after this date and these have been listed below. All others will need to be topped up with a period of Further Learning (to bachelor degree level) after graduation, in order to meet the academic requirements for Incorporated Engineer status.

Further Learning can be achieved in a combination of ways – accredited full, part-time or distance learning programmes in Higher Education or work-based learning. See [www.jbm.org.uk](http://www.jbm.org.uk) for further information and details of accredited Further Learning programmes.

Note that from 2011, an HNC will only meet the educational base for an Engineering Technician and not IEng partial.

Mode of Course

DL = Distance Learning

FT = Full Time

PT = Part Time

S = Sandwich)

Courses are accredited for a given intake period normally on a five-yearly cycle although this may vary (see footnote 1). The years shown in the listings are the inclusive intake periods for which these courses are accredited.

Please note that in some cases, accreditation beyond 2011 might be pending. Please contact the JBM Secretariat at [jbm@ice.org.uk](mailto:jbm@ice.org.uk) for further information. <sup>1 2</sup>

---

<sup>1</sup> Where an intake year has not been extended, this will usually be because the University no longer offers civil engineering courses, for example the entry for the University of Hertfordshire.

<sup>2</sup> Accreditation periods since 1999 are shown in bold type. Historical data on all accreditation activities is held at the ICE, IStructE, IHE and CHIT and you should contact the Institutions directly if you have any queries.
